

FEATURES & BENEFITS

GluGone®
ADHESIVE REMOVER

- GluGone® is safe to use on all skin types
- GluGone® saves time for all staff members, making removal of adhesives and dressings seamless
- GluGone® single-use vials are EtO sterilized and appropriate for use even in a sterile setting
- GluGone® safely removes adhesive residue by breaking down the adhesive barrier to the skin thus reducing the likelihood of skin tears
- Easy to use ampoule with new protective coating that guards against unintentional piercing of surgical gloves while applying
- Proprietary applicator tip that makes application easier than ever to apply to patient. Just one squeeze and you are ready to go
- Available in multiple package and applicator options for every use*

*Sterile packaging only available in single-use vials
